A Comissão Europeia revelou o pacote legislativo 'Fit for 55' após a aprovação, em abril, da Lei Europeia do Clima - que consagra na legislação europeia o objetivo de atingir a neutralidade climática até 2050 e um corte nas emissões de gases com efeito de estufa de pelo menos 55% até 2030 [European Green Deal: Commission proposes transformation of EU economy and society to meet climate ambitions](#). **Aviation** and maritime fuels cause significant pollution and also require dedicated action to complement emissions trading. The Alternative Fuels Infrastructure Regulation requires that aircraft and ships have access to clean electricity supply in major ports and **airports**. The ReFuelEU Aviation Initiative will oblige fuel suppliers to blend increasing levels of sustainable aviation fuels in jet fuel taken on-board at EU airports, including synthetic low carbon fuels, known as e-fuels. Similarly, the FuelEU Maritime Initiative will stimulate the uptake of sustainable maritime fuels and zero-emission technologies by setting a maximum limit on the greenhouse gas content of energy used by ships calling at European ports.
